Long-Running Gardening by the Moon Calendar Expands in Length and Scope

Syracuse, NY - Wolf Hill Press, publishers of the long-running Gardening by the Moon Lunar Almanac & Planting Guide, have greatly expanded the scope and depth of the information presented, including:

- a new 6 page introduction to lunar gardening at back of calendar
- added in new layers of information, including eclipses, meteor showers, and average first and last frost dates by USDA Hardiness Zone
- updated Long/Medium/Short seasonal information to reflect our changing climate
- added more specific information regarding seedsaving and growing/harvesting medicinal herbs
- removed advice to use petroleum-based gardening products and replaced with plant- and mineral-based recommendations
- expanded monthly planting lists with new vegetables, herbs, and flowers
- now available in Eastern, Central, Mountain, and Pacific Time for all season lengths

Wolf Hill Press is passionate about accurate, accessible information and in addition to offering many free learning resources on the web (GardeningByTheMoon.com/lunar-learning/), the worker/owner team of Maxx and Toby, both with extensive backgrounds in education, have recently begun teaching community workshops on the topic of lunar gardening.

They look forward to expanding their published offerings in the near future, and have various projects planned, including books like a guide to the lunar gardening year and an introduction to moon gardening for herbalists, perpetual lunar calendars, maps, and more.

Wolf Hill Press is a small worker-owned publishing company focused on creating beautiful, informative, Earth-centered works. Everything we make is printed either in-house or at our local union print shop using recycled, recyclable, and home-compostable materials.

We are an ethics-driven found family business interested in collaborating with other small, local, worker-owned, and/or ecologically responsible businesses to build alternatives to the megacorporation supply chain.
